

FIROOZEH SHARGH ARAS CO.

FERTILIZERS BY  
**PHOSAGRO®**

## THE CHAIN OF PRODUCT AND TRADE

## The Result of using a good Fertilizer

Fertilizers enrich the soil. The soil is the main source of nutrients for the plant to grow. Fertilizers, help you to grow more healthier plants, better crops and delicious food.

Sun

Oxygen

Fertilizers being absorbed by the plant

### Why Plants Matter

- Every food chain begins with plants
- Plants are producers of oxygen, which is what most living things need to survive.
- They absorb carbon dioxide, a gas which in excess contributes global warming.
- They "recycle" by taking in nutrients from decomposed matter through the soil.

Firoozeh Shargh Aras Co.
